## AWARD FIRST PRICE

Folki IDE Desktop provide a user-friendly interface for children to enhance their potential . In this interface we will find a lot of scenarios , in which the user will face daily real problems , and learn to solve them using the IOT . With this scenarios , he will be able to build his own IOT solution , learn repeat loops , conditionals , basic algorithms , manipulate the sensors with different actions. Mainly , Students drag and connect the 'Blocks' which are basically pre-programmed pieces of code. Once you think you've planned out the program , connect the board and sensors correctly; you press 'Run', and the board will execute your program...
